

Place Value Challenge (3 digits)

Materials: number cards 0-9 (4 of each), Place Value Challenge recording sheet

1. Deal four cards from the top of the deck to each player.
2. Players use the four cards to make the largest three-digit number possible. Each player discards one card.
3. Record your numbers and the number you decided to discard (put in the trash) on the recording sheet.
4. Players compare their numbers using the appropriate math talk sentence. The player with the largest number for the round scores 1 point.

My number is ____.
____ is greater than ____.

My number is ____.
____ is less than ____.

5. Repeat steps 1- 4 until six rounds have been played. The player with the largest total number of points at the end of six rounds wins the game.
