

Salute!

- Materials** ☐ number cards 0–10 (4 of each)
- Players** 3
- Skill** Practicing addition and subtraction facts
- Object of the Game** To solve for the number on your card.

Directions

- 1 One person begins as the Dealer. The Dealer gives one card to each of the other two Players.
- 2 Without looking at their cards, the Players hold them on their foreheads with the number facing out.
- 3 The Dealer looks at both cards and says the sum of the two numbers.
- 4 Each Player looks at the other Player's card. They use the number they see and the sum said by the Dealer to figure out what the number on their card must be. They say that number out loud.

- 5 Once both Players have said their numbers, they can look at their own cards.
- 6 Rotate roles and repeat the game.
- 7 Play continues until everyone has been the Dealer five times, or until the entire deck of cards has been used.

The players use the number they see and the sum to try to figure out what their own number is.
