

## Animal Habitat Notes

### Monday: Desert Animals

Describe the climate in deserts.	
How do Gila monsters' bodies help them save water?	
Why do camels have humps?	
Why do desert animals come out at night?	
How do animals, like birds, get water?	

### Tuesday: Polar Animals

Describe the climate near the North and South Poles.	
How do sea lions and whales stay warm?	
How does fur help foxes and wolves?	
How does fur help polar bears?	
How do penguins' feet help them?	

### Wednesday: Rainforest Animals

Describe the climate in rainforests near the equator.	
How does wet weather help amphibians?	
What helps monkeys live in trees?	
How do some rainforest animals get food?	
Why do animals, like katydids, use camouflage?	

### Thursday: Wetland Animals

Describe wetlands.	
What are some animals that live both in and out of water? Why?	
Why do some insects live in wetlands?	
What do long-legged birds do in wetlands?	
How do beavers help make their own wetlands?
