

Compare and Contrast Two Habitats

Last week, you read about animals in 4 habitats--deserts, polar regions, rainforests, and wetlands. Today and tomorrow, your job is to compare and contrast 2 of those habitats.

1. First, choose two habitats to compare and contrast.

first habitat

second habitat

2. How are the two habitats similar? Consider the landforms, bodies of water, climate, and plants.

3. How are the two habitats different? Consider the landforms, bodies of water, climate, and plants?

4. How are the animals that live in the two habitats similar?

5. How are the animals that live in the two habitats different?

6. Name at least 2 adaptations that help animals in one of the habitats survive.

7. Name at least 2 adaptations that help animals in the other habitat survive.

8. Which habitat would you prefer to live in? Why?

9. If you could be any of the animals you read about, which one would you be? Why?
